5 of 6 survey respondents, expressed they have a Protected Characteristic that disadvantaged them.

B - Qualitative Evidence This is data which describes the effect or impact of a change on a group of people, e.g. some information provided as part of performance reporting.

Social - case studies; personal / group feedback / other

Comments from those who identify as having a Protected Characteristic:

I have no idea from the information how groups using the building might be affected when sold or given away.

There are very few activities for the older age group in the area.

For those unable to travel there will be NOWHERE to go for indoor activities.

I use regularly for my exercise class pacifically for elderly. Not many places for elderly to have regular exercise.

As a retired person I rely on the activities on offer to allow me to mix with other people.

Best Judgement:

Has best judgement been used in place of data/research/evidence?	No
Who provided the best judgement and what was this based on?	

What gaps in data / information were identified?	
Is further research necessary?	Yes / No
If NO, please state why.
